

ND Pharma & Biotech Co.
In Brief

ND Pharma & Biotech

2025

LONG-TERM THINKING

Our philosophy is to think in the long term, that means to not succumb to temptation of short-term fashion product market in favour of sustainable decision-making and strong support of innovation.

So our investments, policies and businesses orientation are planned in the long-term focus, to the lasting benefit of all our customers, from those with incipient relationship and small acquisitions to others in the top range of purchase. All of them are part of our family, The ND Pharma & Biotech family.
Your family.

In Brief

January 2025

Our Primary responsibility is for
the interest of our clients.
As a matter of principle, we strive
on our customers confidence and
trust. Over any other concept we
want to be reliable.

**Message from
*The President***

ND Pharma & Biotech Company Limited, is a research-based biopharmaceutical company that discovers, develops and commercializes innovative medicines in areas of unmet medical needs and operating and conducting businesses in many other fields and sectors, most of them related to human health as food, nutrition, biosciences, neurosciences, and other.

ND Pharma & Biotech Company brings world-class science and products to the global marketplace in the form of innovative products, materials and services.

The company believes that by collaborating with customers, governments, non-governmental-organizations and thought leaders it can be helpful to find solutions to global challenges as providing remedies for certain medical and health conditions that society to deal now.

We contribute to the society through the research and innovation, thus far through the improvement of Pharmaceuticals, Biopharmaceuticals, Biochemicals, API's, intermediates, molecules, reagents, and rare chemicals, trading products, fine and non poisonous ingredients, and many more referential items, in order to let manufacturers and industry sectors to elaborate healthy foods, beverages, medicines, and many other products suitable for health protection and wellness promotion making it available for people everywhere, meanwhile dependence on toxic chemicals decrease, protecting life and the environment.

Our system of collaborative and cooperative work let us to count and rely on an innumerable number of unique and differentiated partners, commercial, industrial, technological and many others, all strategic.

All that, in an effort to improve every day and bring to our customers our best.

Please, let us be part of your success.

Jess P. Hartford
President of the Board of Directors

Our Business Model

The Work We Do

Our core mission is to help science and industry to improve the quality of life of people throughout our efforts in research and discovery and its applications to commercial markets.

We are committed to deliver and supply the highest quality of products in deep collaboration with our partners, customers and agents.

Research

This business unit is focused on service to clients from different fields from academia to government labs as well as companies in the food, nutrition, health and medical sectors, including pharmaceuticals and biopharmaceuticals. The aim of this unit is to develop innovative tools and solutions to let our clients to number the complex areas of research that are demanding solutions in the evolved and ever-growing society. We have created a leading portfolio of chemicals and biological compounds that is growing to impulse our sales channels.

Commercial

This business unit serves customers that are in the business of manufacturing final products from different sectors from life sciences to construction and building or electronics. Our customers require certain raw materials that have an important impact on the performance of their industries and businesses as well as over their final products and competitive capacity. Our aim is to play an integral role in their business providing the molecules, compounds and products that they demand constantly.

Applied

Market for our products and solutions are growing exponentially as far as is growing the number of clients and prospective clients that are using our products or analogues in their ordinary business and production. We want to be focused also on that kind of client. Those companies will be profiting from the use of advanced solutions and research from us, since they are not in the position for developing their own technologies and science.

Our Divisions

A strong constant global expansion that makes us stronger in certain fields, countries and territories is the vision behind our aim.

To achieve this objective, we do not hesitate in forming different kinds of association agreements, joint ventures, partnerships and sometimes entering in the impulse of certain spin-offs with some of our existing development partners worldwide.

Bio – Research

Bioresearch Markets are part of our target with cell and molecular biology products and other references for basic drug discovery and applied research.

Biotechnology and Pharma

We support emerging and well-established companies and companies and innovation centres in the pursuit of novel therapeutics at all the involved stages from commercial supply to manufacturing placing our expertise and technology to customer's service to reach top quality products.

Food & Nutrition

To add value to our customer's products and formulas is at the core of our Food & Nutrition Division. We include Food, Feed, and Health (Special Hospital Nutrition), and many other sectors of the Division within the scope of this important area for us.

Industrial Division

We offer quality of service and support to industry and industrial sectors through this important division in the areas of quality management, regulation, compliance and development, all basic pillar of the industrial progress and success, in a variety of sectors, fields and applications.

Chemical Division

Our offer of chemicals, API's and other molecular solutions is based on experience, trust, quality and reliable sourcing of materials. We partner with companies and suppliers managing state-of-the-art facilities and custom manufacturing technologies to offer to our clients and the markets they serve and operate the very best of available.

Agriculture, Fisheries, Crop Protection

We offer several solutions from crop protection to fisheries, manufactured products, agrochemicals, chemical intermediates and Biotech cutting edge advances as the STD-Microgene, a revolution within the field for coastal and sea-salt affected lands.

Overview

To Make Life Better

*Is the mission and vision that lies
at the heart of our company and
business.*

Food Ingredients

Many of the world's largest and best-known food manufacturers rely on ND Pharma & Biotech products and technology designed and engineered for natural preservation and protection of hundreds of essential food ingredients. Our high-quality products, best-performance technologies and innovations in industries from agriculture to food manufacturing and processing are in many of the products consumers use and enjoy every day, from grains and meats to salad oils, yogurt and chocolate, ensuring a better food safety, and trust on.

Feed Ingredients

The growing of industries and sectors related to agriculture, farming, livestock and the suppliers of greater sectors within is constantly being challenged to meet growing worldwide demand, produce attractive products, fight diseases, increase performance and profitability in a more secure and sustainable environment. ND Pharma & Biotech has an ever-increasing number of quality feed ingredients and other innovations that address these issues giving a complete satisfaction to producers and industries in a supporting role and effort to give value to the sectors and fields where we are operating, both directly or through partners, commercial, industrial, technical and of any other class.

Medical/Health

Medical Devices and Pharmaceuticals are part our business. We are allowed to make and produce (by ourselves or thru partnerships) High-Quality GMP-GDP products, therapeutics and other technological advances in the pursuit of our vision and mission. (To Make Life Better), and specially our Division motto; (More Hope for Tomorrow).

Overview

To Make Life Better

Is more than a discovery, a supply or the provision of products and services. Its the way we feel this business: deep-heart involvement and sincere dedication.

Industrial Products

Price competitiveness, evolutionary chemicals, green chemistry, advanced materials, nature sourcing as natural antioxidants, vegetable-based lipids, specialty ingredients, more sustainable products with enhanced specifications, bio-based content and performance, adaptability to changes within the normative frames and regulations, rise of low-priced imports, and many others are just some of the baseline philosophy under our daily effort and work dedication of excellent service to the industrial sector.

Give us the opportunity to talk about your needs and the solutions we may offer to such needs.

Nutrition/Supplements

Consumers, and thus far the industry is looking permanently for new ways to make their lifestyles healthier and better. This means essentially a look for foods, beverages, ingredients, nutrients and supplements that may provide health-enhancing and health-protection properties. ND Pharma & Biotech develops and markets thousand of such kind products, molecules, compounds and mixes to satisfy the unceasing demand for innovation.

Chemicals

We are a Chemical company. So, we source almost any ingredient, compound, molecule, chemical entity or product (branded and unbranded) you may need or can be found in the world. From our scientific team leaders to the well coordinated network of collaborators, (institutional, academic, research of productive) we foster all necessary actions to provide with the best solution at the better price possible, always.

...and much more!
